

# Access Control Hardware And Software Solutions

*RS2 Technologies has a reputation as a “one-stop” solution for the access management needs of customers in a wide variety of applications.*

RS2 delivers a cost-effective access management solutions to customers in industries as diverse as shipbuilding, energy, hospitals, education, defense, banking, government (federal, state and municipal), museums, and a variety of diverse manufacturing companies. From small office buildings to large industrial facilities, RS2 has the products to meet the needs of business and industry. With a rich feature set, continuous integrations, and the lowest total cost of ownership RS2 Technologies offers the best value in access control.

**Innovation pervades our company culture.** You will see it in our products and in our approach to customers. Whether it's our integration of customer suggestions into the next edition of our software or our use of a web-based technical support system, we try to bring innovation into everything we do.

**RS2 hardware products are based on the most reliable, industry-proven hardware available.** Our products not only undergo rigorous bench and field tests, but have been proven through years of service in a variety of demanding environments. Our software, based on proven Microsoft .NET framework, undergoes multi-level, multi-platform testing, as well as extensive beta testing.

**RS2 products are always expanding with a focus on interoperability.** We understand that to deliver a complete solution each part must work together seamlessly. Our software integrates with the best in the industry with new integrations being added all the time. We have full video support, biometrics, locksets, data-on-card solutions, power management and monitoring, mobile credentials, visitor management, and more.

**RS2 engineering, service and administrative staffs boast a long history in the access control industry.** This is highlighted by a knowledge base that includes backgrounds covering a wide range of security industry disciplines. The owners and principals of RS2 Technologies have been involved in the electronic access control industry since the 1970's, and are active in a number of national and regional security associations and trade groups.

**RS2 Technologies is dedicated to providing expert technical support and services in a timely and accurate manner.** We understand that supporting our customers' needs is as important as the products that we develop. That's why a real person will answer the phone when you call for product support. RS2 Technologies delivers an industry-leading average wait-time and is there to help in an easy and efficient manner.

**RS2 products are available through a nationwide network of experienced dealers.** We have invested considerable time and effort in building a network of dealers who have years of service in access control. RS2 only works with dealers and security system integrators that can create total security solutions for customers.

# Access Control Hardware And Software Solutions

### Industry-proven Hardware

RS2 Technologies has developed an integrated family of access management software that can be configured to meet a wide variety of applications. It

is built around the System Control Processors (SCPs) from Mercury Security. Built on the Linux Embedded operating system, the Mercury Security platform provides a secure access control solution featuring End-to-End Encryption ensuring the facility remains secure.

RS2 Technologies also works with the industry leaders in biometrics, DVR/NVR systems, IP/Wireless locksets, readers & credentials, and enclosures to deliver a complete and total access control solution. RS2 Technologies has been recognized as a Platinum Elite Mercury partner signifying RS2 Technologies is a premiere partner.

The Access! NEXT Step features a pre-configured PC that simply needs to be plugged in and assigned an IP address to deploy

### Access It!® Access Management Software

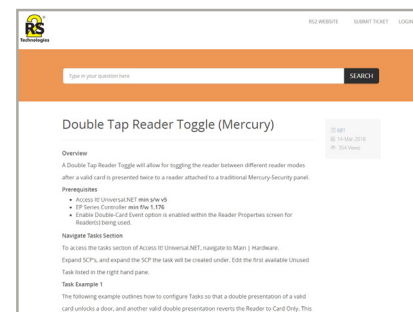

RS2 Technologies offers the industry's most advanced and easy-to-use access control software in the industry. Whether working with Access It! Lite.NET, an entry-level access control software, the Access It! NEXT Step network appliance, a plug and play network appliance device that simplifies access control deployment, or Access It! Universal.NET, a system built to handle anything from a single door to a worldwide enterprise, RS2 Technologies has a solution to meet your needs. A simple and logical UI make learning and using the software painless while still delivering security and stability.

The Access It! Universal.NET software contains numerous features, like mapping, built right into the software standard.

### Technical Resources

Training videos are available to all registered website users. Additionally, the knowledgebase, located at [helpdesk.rs2tech.com](http://helpdesk.rs2tech.com) contains 100's of articles detailing system requirements and configuration, hardware installation, common features, configuring and using integrations, and troubleshooting routine issues. In the Technical Resources section of the site, we post our popular series of White Papers, which cover such topics as Total Cost of Ownership, Open Architecture, and Integration. Also available are Case Histories and Integration Sheets covering the integration of access control with sub-systems such as DVR/NVR, Intrusion Detection, and Wireless/IP Locksets.

The helpdesk includes articles covering a variety of related topics 24/7 as part of our commitment to supporting our customers.

### Service and Support

We understand that supporting our customers' needs is as important as the products that we develop. RS2 Technologies is dedicated to providing expert technical support and services in a timely and accurate manner. RS2 offers phone support to our dealer network and end-users with a Direct Support Agreement (DSA).

Boasting industry leading best wait-times and a knowledgeable support staff, RS2 strives to deliver the best support in the industry. In addition to phone and web support, we also use the web-based TeamViewer system to assist customers with rapid diagnosis and resolution of support issues. TeamViewer allows us to instantly share and interact with remote customer desktops – anywhere in the world.

Our knowledgeable and talented support team delivers unparalleled support to our customers.
